

Intra-Week ALERT for Wednesday – August 12, 2015

“Gold, Silver, Euro Surges... & the Dollar Swoon” [EXCERPT ONLY]

Gold, Silver & the Euro are all *initially* validating recent (**late-July** in metals; **early-August** in Euro) buy signals and analysis for an overall rally into **mid-September**. At least for the moment, Gold & Silver have precisely fulfilled Major downside objectives - in time AND price - and bottomed right in line with **July 2015** cycle lows and Major support ranges.

Meanwhile, the Dollar triggered a new sell signal with the **August 7th** close and is expected to drop back to its March 2015 lows by/in **mid-September**. That is also the time when a ~5-month bearish phase is expected to *culminate* in Stock Indices... which have also closely adhered to near-term expectations...

Stock Indices are in the midst of the time - the *second half* of the **late-April--late-Sept. 2015** period when a 20% correction has been expected - when more accelerated declines are likely (and have materialized).

The 500/DJIA pt. drop of the past 48 hours validates that... and it took the Indices right to their intra-week support where a short-term low was most likely.

Before getting to the near-term, it is good to recap the overall outlook...

To culminate the *first half* of that ~5-month period, the Indices experienced sharp declines into **early-July** & created a ~10-week high-low-(low) Cycle Progression targeted for **Sept. 14--18, 2015...** *when an initial low is likely.*

That reinforces previously-published analysis regarding the *32--33 Week Cycle* that also projected a drop into **Sept. 14--18th** or **Sept. 21--25th**.

The DJIA created a coinciding, ~60-degree high (Jan. 22)--high (Mar. 20/23)--high (May 19/20)--high (**July 16--20**)--low (**Sept. 16--23**) Cycle Progression - targeting an intermediate low for that same time frame.

In the midst of that period, the Indices were expected to see a convincing drop from **July 20--August 7th**. They fulfilled that analysis, with a corroborating daily sell signal - on **Aug. 5th** - ushering in an accelerated drop into **Aug. 7th**.

That triggered a quick bounce on Monday, followed by the fulfillment of the unique scenario anticipated for this week...

The first part of that scenario - described last week - involved the DJIA reaching a low of ~**17,160** this week, fulfilled with today's spike to **17,125/DJIA**.

That also involved initial fulfillment of expectations for this latest drop to test ~**17,100/DJIA**.

As a result, the DJIA has now experienced 3 consecutive 1--2 week declines of 650--700 points and 4 consecutive declines (the first one was longer than 1--2 weeks) of 650--700 points, since its peak.

More importantly - for this week's scenario - that low (if it holds through the rest of the week) creates a weekly HLS for next week at **16,546/DJIA**, just below the monthly HLS of **16,610/DJIA**.

A drop to that level would have the DJIA fulfilling half (10%) of its expected, **2Q/3Q 2015** decline. That would also have the DJIA nearing its yearly Raw SPS for **2015**.

Intra-Week ALERT for Wednesday – August 12, 2015

“Gold, Silver, Euro Surges... & the Dollar Swoon” [EXCERPT ONLY]

In the meantime, the short-term downside potential has been fulfilled and a near-term low is set. A corresponding cycle - that is helping time the 1--2 week swings - can be seen in the Dow Transports...

Since its early-April low, the DJTA has swung in a very consistent, 12--14 trading day cycle. After its 13 trading-day rebound - in April - the DJTA has traced out a 12--14 trading-day high-high-low-low-low Cycle Progression that projects a low on **Aug. 12--14th**.

While spiking down into this (short-term) cycle low, the Transports tested monthly support (**8096--8151/DJTA**) and the convergence of recent daily HLS levels (extreme support at **8163--8174/DJTA**)... without turning their daily trend down.

All of those factors created a short-term low and project a rebound & retest of the **early-August** high. That is possible by/on **Aug. 17th**, based on an opposing daily Cycle Progression.

1--3 & 3--6 month traders should xxxx **[All trading strategies specifics reserved for current subscribers only. See complete 8/12/15 Alert for further details on why Aug. 17--21st is such a dangerous period for Stock Indices... and Dollar].**

The **Dollar Index** fulfilled expectations for a rally into **early-August** - perpetuating a 21--23 week low-low-high-low-low-high-(high) Cycle Sequence & a related 10--11 week high-high-(high) Cycle Progression - and then immediately reversed lower.

The **Aug. 7th** high made that very precise, perpetuating a 72-day high-high-(high) Cycle Progression... and completing a 50% rebound (in time). More importantly, the Dollar created that spike high without turning the weekly trend up AND

without turning its daily trend up... and as the weekly 21 MAC was turning down.

It finished off that scenario, creating an outside-day/2 Close Reversal lower on **Aug. 7th**... a sell signal that projected an additional 2--3 days of downside.

The Dollar quickly confirmed that by turning its intra-month trend down... and has since dropped to monthly support.

Ultimately, this new decline could last into **mid-September** and perpetuate a 13-week/90-degree low-high-low-(low) Cycle Sequence that has already triggered intermediate turning points in mid-Dec. '14, mid-March & **mid-June '15**.

The **Euro** did the opposite, reinforcing its recent buy signal and projecting a rally into **mid-Aug.** & ultimately **mid-Sept.** It has attacked monthly resistance and needs to close above that to project more upside in the near term.

The **Yen** spiked down to new lows, fulfilling the 10-week & 5-week Cycle Progressions that projected an intermediate low for **August 10--14th**. It gave an outside-day/2 Close Reversal higher today but needs a daily close above **.8081/JYU** to confirm.

1--4 week traders should have bought Sept. Euro xxxx **[All trading strategies specifics reserved for current subscribers only.]**

1--4 week traders should have sold Sept. Dollar Index futures at 97.81 up to 98.97 and xxxx **[All trading strategies specifics reserved for current subscribers only.]**

Intra-Week ALERT for Wednesday – August 12, 2015

“Gold, Silver, Euro Surges... & the Dollar Swoon” [EXCERPT ONLY]

Gold & Silver have begun to rally, initially validating cycle lows in **July 2015**.

This could spur an overall 4--6 week advance, reinforced by the fact that Gold & Silver have a developing ~4-month/17--18 week high-high-(high) Cycle Progression - much like the cycle spanning their *lows* of the past year - that projects a *peak* in **mid-September**.

In the case of Silver, the current rally would match the duration of the Dec. 1--Jan. 23rd rally if it lasted into **mid-September**.

1--4 week traders should have bought xxxx **[All trading strategies specifics reserved for current subscribers only.]**

1-2 year+ traders & investors should have been entering partial long (cash) positions in late-July/early-

August and should xxxx **[All trading strategies specifics reserved for current subscribers only.]**

[Stock Indices poised for bounce into Aug. 17th and then even sharper drop, with DJIA capable of reaching 16,546--16,610 by/on August 21st!

Aug. 18-21st = Dangerous Period!!

Gold, Silver, the Euro & Yen are all giving bullish signs and should advance - on balance - into mid-September!

Refer to complete August 12, 2015 Weekly Re-Lay Alert for details and related trading strategies.]
