

EXCERPT: Intra-Week ALERT for Wednesday – Sept. 16, 2015

“Gold’s Sept. 11--24th Up Cycle; Will It Extend?”

Gold, Silver & the XAU were expected to complete their pullbacks on **Sept. 11th** - the latest phase of the 6--7 trading-day high-high-(low) Cycle Progression that last timed the **Sept. 1st** high** - and then see a rally into ~**Sept. 24th**, when intermediate cycles converge.

[**The preceding phases of that cycle created a 6-7 trading-day low-low-low-(high) Cycle Progression that precisely timed the **Aug. 24th** peak - when initial long positions were exited - and then the secondary high on **Sept. 1st**.]

The action of **Sept. 14th** & **15th** validated that as both metals held their **Sept. 11th** lows - a low that attacked & held the 2DGR (.786) retracement level in Gold... the most common level for a ‘b’ or ‘2’ wave low. Silver retested its **Sept. 11th** low and did not close below it, reaffirming its significance.

That corroborates the outlook for a new 1--2 week surge that could take Gold & Silver back to their **Aug. 24th** highs, even as they perpetuate a ~30-degree low (July 24th)--high (**Aug. 24th**)--high (**Sept. 24th**) Cycle Progression.

The action of **Sept. 1st--15th**, however, is increasing the possibility that there will be more (to the upside) in the near future.

And, there are multiple reasons for this - some of which involve current indicators & cycles and others that involve the *potential* for...a larger-degree ‘4-Shadow’ signal in Gold and/or Silver...

There are several reasons why it is *possible* in this time frame. However, the more significant aspect is what it would mean for **2016** - and how it would corroborate the overall outlook - IF it did transpire now. [Conversely, if it does NOT transpire, that

would NOT change the outlook for **2016**. The difference has more to do with scale & scope.]

-- Please refer to **2016 - The Golden Year Reports** for details on outlook for **2016**. --

To put it concisely, a **4-Shadow** signal is generated when xxxxx... (For more on this, refer to *Eric Hadik’s Tech Tip Reference Library*.)

In the case of Gold, its recent rally slightly exceeded the magnitude of its March--May ’15 bounce. That is an initially positive sign that usually prompts a reactive drop back toward the lows (at least to the .786 retracement level).

That was fulfilled on Sept. 11th.

However, I am more focused on the next larger-degree **4-Shadow** potential for Gold...

Gold experienced sharp bounces - though each was of slightly *lesser* magnitude than the one before - in June--Aug. 2013, Dec. ’13--Mar. ’14 and Nov. ’14--Jan. ’15. So, in order to trigger a larger-degree **4-Shadow** signal, Gold would have to xxxxx...

There are as many - or more - intermediate cycles & wave projection tools that converge around **xxxx xx/xx**, as there are cycles that converge around **Sept. 24th**...So, Gold could fulfill both expectations - for a new surge into **Sept. 24th** AND for a continued advance (after an intervening pullback or consolidation) into **xxxx xx/xx**.

Among the reasons for this are: [Please refer to the entire, 6-page **Sept. 15, 2015 Intraday Weekly Re-Lay Alert** for full details on this & other analysis. Specific dates and price targets redacted from this excerpt and reserved for subscribers only.]

EXCERPT: Intra-Week ALERT for Wednesday – Sept. 16, 2015

“Gold’s Sept. 11--24th Up Cycle; Will It Extend?”

There are more reasons for this possibility... and slowly-developing clarity on what to expect between now and **Jan. 2016**...

Gold & Silver are mimicking the action of Nov. & Dec. 2014, when both set intermediate lows - in perfect synchronicity with intermediate (Nov. '14) cycles - and both rebounded.

Then, during the ensuing pullback, Silver spiked to a new low (without ever giving a weekly close below its previous low) as Gold bottomed at higher levels - after a .786 retracement.

Sound familiar?

That is VERY similar to what took place between **July 24th--Aug. 26th**, when Silver spiked to new lows without ever giving a weekly close below its July 24th low... and Gold bottomed at higher levels.

In Dec. 2014, both metals then surged...

I guess that's another reason/parallel/analog that reinforces the *potential* for Gold & Silver to extend this advance into **xxxx xx/xx**.

Ultimately, Gold needs to...

The **XAU** also bottomed on **Sept. 11th** - in synch with daily cycles - but needs a daily close above **49.45** to signal an intermediate bottom. **[End Excerpt.]**

The action of **Sept. 14--16th** has validated the scenario for a rally from **Sept. 11th** into **Sept. 24th**. However, the **Sept. 17th** & **Sept. 18th** trading - and closing levels - are the real key!

And all of this is setting the stage for next year as it steadily validates analysis described in the **‘2016 - The Golden Year’ Reports**.

Please refer to current publications for more detailed analysis & trading strategies.
